

ARLA Press Release (English) – 2017-02-06

COPIER Acquires ARLA Machines

The Dutch company Copier Bevelmachines from Giessen (NL) acquired the complete machine products division from ARLA Maschinentechnik GmbH, Wipperfuerth (DE). Copier develops the well-known Beaver tube end preparing machines and sells them worldwide. Now Copier bought the ARLA brand, because this high quality product fits perfect to their company philosophy: designing and building reliable machinery for the piping- and end-working industry.

From now on Copier continues the development, production, marketing & sales of the ARLA machine products (like ARLA Shift Levers, ARLA Clamping Systems, ARLA Spindle and ARLA Slide Units, ARLA End-Working Machines for pipes, tubes, and shafts) worldwide.
