

COMPANY INFORMATION No. 01 / 2017

ARLA Engineering Services exclusively continued and supported by Laschet Consulting: Vibration Analysis of Drive Systems

Engineering services and simulation support as originally offered by *ARLA Maschinenteknik GmbH* in *Wipperfuertth (DE)* will be exclusively continued by **Laschet Consulting GmbH** in *Bergisch Gladbach (DE)* starting with Nov 1, 2016. These services are dedicated to companies mainly involved in drive technology.

With his new consulting and engineering company **Dr.-Ing. Andreas Laschet** offers the complete range of torsional vibration analysis (TVA) and the rotordynamic calculation and evaluation of complete shaft systems in rotating machinery. Thus, the previous ARLA engineering services are now exclusively bundled in this new company.

The cooperation with the US company RBTS in Phoenixville/Philadelphia (PA) will be continued as well. The major subject as part of this cooperation is the sale and support of the rotordynamic software ARMD including the corresponding engineering services. It is planned to continue the well-known international rotordynamic seminars in Cologne in the next future.

Laschet Consulting GmbH provides active customer engineering support for the German and European market, but also worldwide as partner involved in international projects.
